TREASURY

Treasury

Safely manage your entire portfolio with Tessier Treasury, our flagship digital asset management system.

- Use scheduling and privacy controls to align the sending and receiving of assets to your business operations.
- Gain detailed insights into your transactions and addresses with financial reporting features, including funds received and transferred.
- Create a wallet portfolio with flexible permissions.
- Add an extra layer of security with Two-Factor Authentication to protect against unauthorised access or potential security breaches.
- Track user activity with audit trails for improved transparency and visibility.
- Integrate Treasury into your existing systems or combine it with other products in the Tessier portfolio.

Key Features

- Create and manage online wallets
- Support for multiple digital assets
- Flexible transaction search and proposal tools
- Transaction scheduling and privacy controls
- Dedicated customer support
